The Children's Aid Society prejudged our community, thought that since we are persecuted people, we shall be easy prey for them. They start persecute us for nothing or may be for being devoted Jews.

They started with the same two families that were randomly selected to be called to court in Québec. The Children's Aid Society know as a fact that the 14 children of those two families are at the best condition that is possible for a reasonable family beside that they are suffering from tremendous frustration. Why they have to be treated like criminals for being devoted Jews?

The lawyer of the Society should study a bit more the law and the Canadian Charter before hurrying to terrified innocent families for no reason.

Where this hatred does stem from, that the Society lawyer overlooked the decision of the justice of peace that decide that this children should remain unharmed? why did she choose to appeal the decision on an higher court at the expense of the families? As a human being she should rater resign than committing such horrible duty.

But this was just the beginning; the next victim was no other than my innocent children that were apprehended, why?

You know why? Because I'm devoted Jewish mother from the devoted Jewish community called Lev Tahor! That's why the blood and pain of my children are no even worth for consideration by the Children's (afr)aid Society.

Why they choose to begin to destroy my life before destroying other in the Lev Tahor, it is just a matter of finding plots, they probably do not have enough homes for keeping to many apprehended devoted Jewish children, so they must to start somewhere, grabbing some at a time for nonsense plots convert them to secularism and modernization and to grab a bit more children with some more plots...

On my case, it was a permanent marker that caused the tragedy. They didn't even sick to get a warrant, they hurried to horrify.

At the time of the apprehension I was due to give birth. I will never be able to describe this painfully five days. Only Hashem save me from falling apart for ever.

Hashem did bless Ontario with honorable straight and true Judges that one of them ruled to immediate returning the children to my and my husband's care.

However, at that time I was not in the position opposing the last minute offer from the Society to agree to a supervision order. I did agree and at the time, the honorable Judge approved the uncontested agreement as part of an interim court order.
