Just hours after the honorable Judge decision to return the children, I gave birth to my 3rd child, O Hashem how can I thank you, the baby born healthy and neither I nor my new born boy suffer any emotional or other health problem. It is a miracle from Hashem to show that he is in fact listening to prayers that are accompanied by tears.

Meanwhile my friends, the other innocent beloved mothers of the community, started to feel the nature of a wolf that seeks causes to scramble a sheep in any of the further daily repeated search visits and interviews, which lasts already more than 2 months just in Ontario, besides more than 3 months of unreasonable investigations by the Youth Protection in Quebec, with no any findings of abuse or neglect of any kind. But the children aid Society of Chatham says they have no intention to stop those unreasonable investigations...

The level of stress, afraid and suffer that the small boys and girls have from the unreasonable search and frightening methods, did not let the community organizers any choice but to let the Society know that they will rather being imprisoned than to let this torture campaign of the innocent children and mothers to reach the 6 month blood-red line.

I was left alone on the front line of the battlefield, bounded by a court decision that was done by good faith of the honorable judge, to allow the Society do conduct visits in my home.

I was so hopeful that the court hearing last Friday will resulted in releasing me from the almost assured possibility that a libel will be anyway made up since I'm the only one left bound to unwillingly 'cooperate' with the Society.

However, it was my fault of a few hours delay in filing my concerns to the honorable court that resulted to adjourn the hearings. I can not imagine my children being further terrorized by seeing again persons visit their house to look for unreasonable reasons to abduct them.

I know that my lawyer will be very upset by his client violating the law and publish all court document with identifying her self and her children's name for the public. But I have no choice; I will rather pay the $10,000 fine than watching my children horrified for noting.

I must cry out to just any one, please call the Society and look for some human feeling at the Society's office and ask them please gave up the improper visits and withdraw your unjustified case against any innocent parents including Jewish devoted one.
